

IT PROJECT & DEPLOYMENT SERVICES

With years of experience handling technology roll-outs of all sizes, we support you as you pursue, win and deploy large projects. When you need to deal with multiple manufacturers and complicated technologies at geographically diverse customer locations, we keep everything under control and moving efficiently. Our global experience and knowledge, coupled with our technical experts and customer care centers, helps us improve our clients' customer interactions and implement change quickly and pro-actively.

DeployRight Project Deployment Process:

DeployRight's Key Features:

- Industry-leading project management
- Proven deployment methodology
- 24x7 installation scheduling
- Staging at state-of-the-art regional facilities or on customer sites
- Online project reporting
- Installations, moves, adds & changes (IMACs)
- Hassle-free de-installations and equipment disposal

Deployment Process Made Simple

With DeployRight you can rest assured that projects are being managed successfully. Our industry-certified Project Managers will serve as your single point of contact and accountability throughout the entire deployment process for a seamless experience. Your PM will work to put a plan in place keeping you in the loop with online reporting and updates, minimizing project risk. Our goal is to make deployment fast, efficient and worry-free.

IT Deployment Services

Why Choose DeployRight?

Our global experience and knowledge, ensures best-in-class services across multiple industries. We help our clients to seamlessly install new technology with minimal disruption to business. Whether the technology deployment is global or local, complex or quick, DeployRight will get the job done - on time and on budget.

Minimize Your Costs

Our Project Deployment Specialists and Dispatch team coordinate with Logistics, Integration Services and Financial Services so you are able to offer a complete cradle-to-grave solution on any project proposals – at the lowest cost. Utilize Project Deployment Services as your single point of contact to manage the entire project so you can focus on what's important – finding new customers and new business.

Advanced Planning for Improved Results

DeployRight's Site Preparation Services ensure locations are ready to handle the physical, networking and electrical requirements of new technology deployments, decreasing the likelihood of problems after implementation.

Deployments at a Speed that Suits You

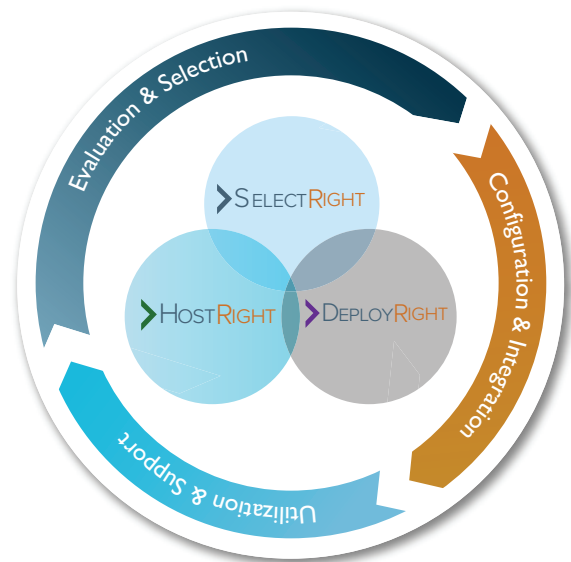

Whether you're installing new technologies or modifying existing equipment, our ultimate goal is to help you improve your customer's experience. Our Deployment Services are backed by a proven deployment infrastructure to ensure that engineers with the right skills complete your roll-out, on time and within budget.

Staging to Ensure Quality

Installation delays, improper component connections and DOA equipment can have a major impact on project timelines. Our staging services dramatically reduce installation time and eliminate on-site equipment failure during installations. Our staging professionals will assemble, load, configure and test all your hardware and software. Our state-of-the-art staging centers also procure and stage multi-vendor products and refurbish old equipment. Rest assured that no matter what your requirements may be, we have a solution.

Beyond Deployment for Long-Term Success

Installation professionals will fully train your customers on new technology to ensure that they are ready to hit the ground running and to make the most of their investment. We'll also de-install and dispose of old equipment as part of the deployment process. You can rest easy knowing we'll comply with the appropriate regulations and environmental considerations.
