

## BUSINESS SUPPORT & IT INFRASTRUCTURE SERVICES

Together with our partners at MFX we are growing our presence in providing cloud-based infrastructure services, leveraging our expertise and offering our clients choices when it comes to their infrastructure needs. Our depth of experience makes us an ideal technology partner for companies ready to take advantage of our speed, innovation and technology.

HostRight brings you data center and infrastructure services, helping to ensure that you have the right platform for optimum processing flexibility and commercial quality service levels to best suit your business requirements.

### Data Center Services

Whether your needs are for business continuity, full data center recovery and restoration or virtual desktop or data replication, HostRight delivers solutions that fit your requirements today and evolve with your business growth.

#### Colocation Services (Standard)

An option for businesses that want the security and redundancy of a private data center without the high capital investment. By placing servers in our off-site third-party data center, you save time and money while improving overall IT infrastructure.

#### Disaster Recovery Services

Whether you need business continuity, full data center recovery and restoration, virtual desktop or data replication, HostRight can design a solution that fits your needs.

#### Colocation Services (Mainframe)

Providing a single point of contact for reporting incidents associated with supported services & applications, including outages and service requests.

#### Managed Mainframe Services

Utilizing the latest mainframe technologies, HostRight provides you with superior support at a fraction of the cost of hosting and maintaining those services yourself.

#### Managed Hosting Services

A full suite of managed hosting capabilities, allowing you to re-allocate IT resources while turning over managed hosting of your environment to our experienced staff.

#### Managed Networking Services

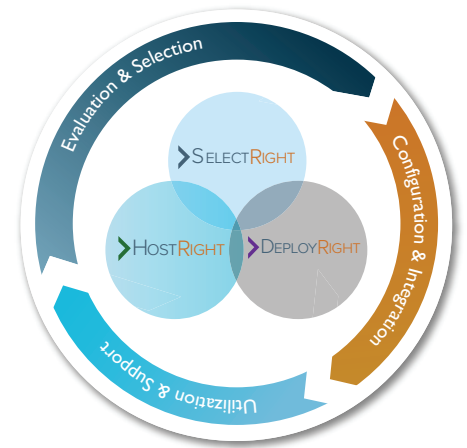

Rapidly deploy efficient and complex network solutions with our cost effective, redundant & scalable architecture.

# IT Infrastructure & Cloud Services

## Infrastructure Services

HostRight is part of a comprehensive suite of infrastructure services that assist you in achieving an optimized, scalable, secure and cost-effective IT infrastructure. HostRight allows you to focus on your core business competencies while utilizing our experienced data center and infrastructure resources (staff, hardware and environment).

HostRight is an extension of your IT infrastructure department and lowers your total cost of ownership while helping you to achieve your business objectives.

## Our Infrastructure Services Include

- **Infrastructure Outsourcing:**  
HostRight helps you to focus on core competencies while using our experienced resources to provide optimized infrastructure services that are scalable and secure.
- **Help Desk Services:**  
Our Enterprise Service Center – your single point of contact for reporting incidents associated with supported services and applications, including outages and service requests.
- **Managed Desktop Services:**  
Our Desktop Services Solutions use the computing industry's latest technologies and best practices to empower you to be more satisfied, productive and efficient.
- **Offshore Application & Infrastructure Solutions:**  
HostRight complements its onshore capabilities with a comprehensive suite of services provided offshore. Our offshore solution provides experienced IT professionals at a lower cost.

## Cloud Services

Our private cloud services provide cloud solutions to service business demands from end user devices to business applications that reside in a company data center. Our private cloud offering can be provided in a dedicated private cloud model or in a multi-tenant virtual private cloud model.

- **HostRight IX Cloud:**  
At the core of HostRight Private Cloud, IX Cloud provides the necessary converged infrastructure for servers, storage & networking is integrated with a cloud operating environment that is fully automated.
- **HostRight PX Cloud:**  
HostRight PX Cloud provides the platform necessary to host the middleware components that drive business applications.
- **HostRight PX Cloud:**  
HostRight PX integrates our private cloud services directly with public cloud providers. HX Cloud enables a seamless integration of IX Cloud and PX Cloud.
